

**Take Shape
For Life®**

Quick Start Guide

featuring
Medifast®
Meals

Welcome to Take Shape For Life®

Congratulations!

You've taken an important first step in controlling your weight and improving your health, and Take Shape For Life is ready to help you, starting right now.

Take Shape For Life gives you what you need to change your lifestyle, reach a healthy weight, maintain it, and enjoy improved health.

As you're reading through this Quick Start Guide, your Health Coach can answer any questions you have, and help you apply the Take Shape For Life BeSlim® lifestyle to your life.

How Take Shape For Life works

The Take Shape For Life program incorporates Medifast Meals, which are individually portioned, calorie- and carbohydrate-controlled, and low-fat. Every Meal provides adequate protein and is fortified with vitamins and minerals. Medifast products were developed by physicians and have been clinically proven safe and effective for weight loss. **The 5 & 1 Plan** creates a fat-burning state in your body while keeping you feeling full. You can lose weight quickly while preserving muscle tissue.

With the 5 & 1 Plan...

- You eat 6 meals a day, so **you won't feel hungry**.
- You **lose weight fast** – up to 2 to 5 pounds a week.
- With a Variety Package, **you pay about \$11 per day** – less than the \$16 per day that the average American spends on food.*
- Your Medifast Meals **go with you anywhere**, so the 5 & 1 Plan fits in with even the busiest lifestyles.

Most important, Take Shape For Life pairs you with a Health Coach, who is your personal ally throughout each phase – weight loss, transition, and maintenance – to support you and your new, healthier weight for the long term.

* 2006 U.S. Bureau of Labor Statistics Consumer Expenditure Survey.

Includes a support center and
inspiring success stories

John, Thuxoan, Jennifer, and Brent lost a combined 443 lbs.

Individual results will vary.

Let's Get Started

The first three days on the **5 & 1 Plan** are critical to your success, so work with your Health Coach to pick a starting day when you don't anticipate any special events that involve a lot of food. Get ready to commit to your **5 & 1 Plan**, and lasting changes for your new, healthier life.

Consult with your physician

We recommend that you contact your physician or qualified medical practitioner before starting with Take Shape For Life, and stay in regular touch throughout your weight-loss progress. You'll want your doctor's supervision if you are:

- over the age of 70
- under the age of 18
- living with diabetes, hypertension, or other serious medical conditions
- taking medications, especially those for diabetes

In addition, your Health Coach is just a phone call away, and can provide support as you begin. Please note that your Health Coach is not a substitute for a physician or qualified medical practitioner.

The 5 & 1 Plan

One simple plan, every day:

Every day choose five Medifast Meals from over 70 different, delicious choices, including shakes, soups, stew, chili, oatmeal, scrambled eggs, fruit drinks, iced teas, hot drinks, bars, and puddings. (Limit one Maintenance Bar, in the green package, per day, as they are higher in calories and carbohydrates than other Medifast Meals.) Plenty of Medifast Meal choices are vegetarian-friendly, kosher, or soy-based – consult your Health Coach or TSFL.com for more information to meet your individual needs.

PLUS 1 Lean & Green Meal

Once a day, enjoy a meal of lean protein and non-starchy vegetables at any time that works best with your schedule. You can prepare it yourself, grab it on the go, or enjoy it in a restaurant – as long as you follow the Lean & Green Meal guidelines.

Kelly lost 50 lbs.

Individual results will vary.

Lean & Green Meal: The “Lean”

Choose meats that are grilled, baked, broiled, or poached – not fried.

LEANEST

CHOOSE A 7 OUNCE PORTION
AND 2 HEALTHY FAT SERVINGS
(see list on page 6)

Fish - cod, flounder, haddock, orange roughy, grouper, tilapia, mahi mahi, tuna (yellow fin steak or canned in water), catfish (wild)

Shellfish - crab, scallop, shrimp, lobster

Game meat - deer, buffalo, elk

Ground turkey or other meat - ≥ 98% lean

MEATLESS OPTIONS*

14 egg whites

2 cups of EggBeaters®

Boca Burger®, Morningstar Farms®, or Garden Burger®:

Choose a variety with less than 6 grams of carbohydrates per patty.
Serving size: 2 patties

LEANER

CHOOSE A 6 OUNCE PORTION
AND 1 HEALTHY FAT SERVING
(see list on page 6)

Fish - swordfish, trout, halibut

Chicken - breast or white meat without skin

Ground turkey or other meat - 95 - 97% lean

Turkey - light meat

MEATLESS OPTIONS*

Tofu (extra firm variety) **15 ounces**

2 whole eggs plus 4 egg whites

LEAN

CHOOSE A 5 OUNCE PORTION
NO HEALTHY FAT SERVINGS
NEEDED (see list on page 6)

Fish - salmon, tuna (blue fin steak), catfish (farmed), mackerel, herring

Lean beef - beef steak, roast and ground beef

Lamb

Pork chop

Pork tenderloin

Ground turkey or other meat - 85 - 94% lean

Turkey or chicken - dark meat

MEATLESS OPTIONS*

3 whole eggs (limit to 1 time per week)

Tofu (firm and/or soft variety) **15 ounces**

*To see our Meatless Options List for additional choices and more detailed information, talk to your Health Coach, visit his or her Web site, or go to TSFL.com.

NOTE: Serving ounces represent cooked weight.

Lean & Green Meal: The “Green”

Enjoy three servings of vegetables served raw, steamed, grilled, baked, or broiled – not fried.

Select any combination of three servings from the list below. All vegetables on the Medifast 5 & 1 Plan Green Options List are good choices while on this meal plan; however, if you are having difficulty reaching or maintaining the fat-burning state, it may help to select from the lower and moderate carbohydrate categories (in addition to re-evaluating your condiment use and temporarily cutting back on your optional snack choices).

Select ANY combination of three servings for your Lean & Green Meal.

LOWER CARBOHYDRATE	HIGHER CARBOHYDRATE	
Celery (½ cup)	Turnip greens, cooked (½ cup)	Broccoli (½ cup)
Collards, fresh/raw (1 cup)	Watercress (1 cup)	Cabbage, red (½ cup)
Cucumber (½ cup)	Asparagus (½ cup)	Collard or mustard greens, cooked (½ cup)
Endive (1 cup)	Cabbage (½ cup)	Green or wax beans (½ cup)
Green leaf (1 cup)	Cauliflower (½ cup)	Kohlrabi (½ cup)
Lettuce, butterhead (1 cup)	Eggplant (½ cup)	Okra (½ cup)
Lettuce, iceberg (1 cup)	Fennel bulb (½ cup)	Peppers:
Mushroom, white (½ cup)	Kale, cooked (½ cup)	green, red, yellow (½ cup)
Mustard greens, fresh/raw (1 cup)	Mushroom, portabella (½ cup)	Scallions, raw (½ cup)
Radishes (½ cup)	Spinach, cooked (½ cup)	Summer squash: crookneck, straightneck (½ cup)
Romaine lettuce (1 cup)	Summer squash:	Tomato, red ripe (½ cup)
Spinach, fresh/raw (1 cup)	zucchini, scallop (½ cup)	Turnips (½ cup)
Spring mix (1 cup)		Winter squash:
Sprouts: alfalfa, mung bean (½ cup)		spaghetti squash (½ cup)

Starchy vegetables such as carrots, corn, onions, peas, potatoes, and brussels sprouts are healthy, but have too many carbohydrates to maintain your fat-burning state on the 5 & 1 Plan. You can enjoy them again – along with all vegetables – in your Maintenance phase once you’ve reached your weight-loss goal.

Healthy fat servings

A small amount of healthy fat is essential for your body, helping you absorb the fat-soluble vitamins A, D, E, and K. Fat gives you a satisfying sense of fullness when you eat, and is essential for your gallbladder to function properly. Not all fats are created equal. Limit your intake of trans and saturated fats, found in things like butter, for best overall health.

Here are examples of Healthy Fat Servings allowed on the **5 & 1 Plan**. Add up to two servings daily based on your Lean choices (page 4):

- 1 teaspoon of canola, flaxseed, walnut, or olive oil
- 5-10 green or black olives
- up to 2 tablespoons of low-carbohydrate salad dressing (containing less than 6 grams of carbohydrates and approx. 5 grams of fat per serving)
- 1 teaspoon of trans fat-free margarine

For additional Healthy Fat Serving options, talk to your Health Coach or visit TSFL.com.

Condiments and seasonings

Enjoy up to three servings a day. Each of the following equals one serving:

- ½ teaspoon of dried herbs and spices, catsup, BBQ sauce, or cocktail sauce
- 1 tablespoon of yellow mustard, salsa, soy sauce, fresh herbs, unsweetened milk or soy milk, balsamic vinegar, chopped onion, or lemon or lime juice
- up to 2 tablespoons of sugar-free flavored syrup (Torani®, DaVinci®, etc.)
- 1 packet of artificial sweetener such as Equal® or Splenda®
- up to 3 tablespoons of hot sauce, Tabasco® sauce, or red, white, or cider vinegar

For a more comprehensive list of condiments, talk to your Health Coach or visit TSFL.com.

Optional snacks (NOTE: Snacks are not to be eaten in place of Medifast Meals)

In addition to your five Medifast Meals and one Lean & Green Meal, you may choose one of the following optional items per day:

- 3 celery stalks
- 1 fruit-flavored sugar-free Popsicle®
- ½ cup of sugar-free gelatin dessert, such as Jell-O®
- up to 3 pieces of sugar-free gum or mints
- 2 dill pickle spears

Sample Meal Plans for the 5 & 1 Plan

Planning what you'll eat each day – and when – is an important key to success with the 5 & 1 Plan. Below are two sample meal plans to give you an idea of how the plan can work for you. We recommend eating every two to three hours. Meal plans can be modified according to your own food preferences and schedule. Talk to your Health Coach today.

Remember, you can have your Lean & Green Meal anytime you like. You can also divide your Lean & Green Meal into two equal portions and consume one at lunch and the remainder with your dinner. For example, try having 3 ounces of chicken breast with ½ cup of broccoli at lunch and 3 ounces of chicken breast plus 1 cup of zucchini at dinner. Eat only the specified amounts of meat and vegetable portions each day. Be sure to always get in your five Medifast Meals.

You'll find lots of recipes and meal planning tools on TSFL.com, or ask your Health Coach.

DAY 1	DAY 2
Meal #1 – Breakfast Medifast Scrambled Eggs	Meal #1 – Breakfast Medifast Apple Cinnamon Oatmeal
Meal #2 – Mid-morning Medifast Dutch Chocolate Shake	Meal #2 – Mid-morning Medifast Cappuccino <i>Recipe Suggestion:</i> Mix your Cappuccino with 1 tbsp sugar-free French vanilla syrup
Meal #3 – Lunch Medifast Cream of Tomato Soup sprinkled with parsley flakes	Lean & Green Meal – Lunch 6 oz grilled chicken breast, 2 cups romaine lettuce, ½ cup total diced tomatoes, cucumbers, and celery, 2 tbsp low-carb salad dressing
Meal #4 – Afternoon Medifast S'more Crunch Bar	Meal #3 – Afternoon Medifast Strawberry Crème Shake
Lean & Green Meal – Dinner 5 oz grilled salmon, 1-½ cups cooked asparagus	Meal #4 – Dinner Medifast Chicken Noodle Soup
Meal #5 – Evening Medifast French Vanilla Shake	Meal #5 – Evening Medifast Chocolate Pudding

Tips for Success on Your 5 & 1 Plan

The first few days

Achieving the fat-burning state on the 5 & 1 Plan takes two to five days. During this time you may feel tired, hungry, or irritable, and/or experience headaches or lightheadedness as your body adjusts.

This is temporary, so hang in there. Within about 72 hours you start to burn fat, and you'll feel energized and less hungry – and you'll get the thrill of seeing results.

Here are some other tips to get you through the first few days:

- If you're really struggling with hunger or fatigue in your first days, don't give up: Have an extra Medifast Shake, and stick to your program the following day.
- Stay busy and occupied.
- Avoid tempting sights and smells of foods until you're strong.
- Call your Health Coach, who can answer questions and offer support and encouragement.

Going forward

Here are more ways to make your weight-loss phase easier and more effective:

Eat every two to three hours – Eating consistently will keep you feeling full and help you lose weight and establish a healthy lifestyle habit.

Don't skip meals – Make sure you eat all six meals each day to keep your body well nourished and your metabolism active.

Eat slowly – Spend at least 15 minutes eating each meal. You can cut bars into smaller pieces to slow yourself down.

Drink lots of fluids – Drink at least eight cups (64 ounces total) of water each day, as well as any calorie-free beverages such as unsweetened hot or iced tea, herbal tea, coffee, diet soda, and sugar-free drink mixes.

Limit caffeine – Your low-calorie Medifast Meals can make you more sensitive to caffeine, so limit coffee and other caffeinated beverages to three servings (or 300 milligrams total) each day.

Tips for Success on Your 5 & 1 Plan (cont.)

Avoid alcohol – Alcohol adds calories and may increase your appetite. Even one drink per day (including low-carb versions) can slow down your weight loss.

Keep a journal – It's important to track your progress, and the Support In Motion Web site makes it easy. Plus, you can share your thoughts with others who are losing weight on the 5 & 1 Plan. Your Health Coach can help you register.

Exercise

Exercise is a necessary component for weight management and overall health.

- **If you are not exercising regularly when you start the 5 & 1 Plan, you should wait two to three weeks before you begin an exercise program.**
- Take it slow at first – just ten or 15 minutes a day – and gradually increase the time and intensity of your activity.
- Choose something you enjoy and can stick with, such as walking, swimming, or bike riding, and make it a daily habit.
- **If you already exercise, cut back on your workout routine by half (decrease intensity, time, or frequency) for your first couple weeks on the 5 & 1 Plan while your body adjusts to the lower calorie food intake.**
- **Limit exercise to a maximum of 45 minutes of vigorous activity daily**, so you're not burning more calories than you're taking in on the 5 & 1 Plan.
- Whenever you exercise, be sure to listen to your body and don't push yourself past your limit. Stop immediately if you feel faint or lightheaded.
- Drink plenty of water, especially if you are exercising outside in warm weather.

Seeing results

Some people may lose weight more rapidly during the first few weeks of the 5 & 1 Plan, then experience slightly slower, yet steady, results as they go along. Weighing yourself in a consistent manner is important: Use the same scale at the same time of day and wear the same attire each time. Be sure to also consider other factors such as whether you're losing inches or noticing a difference in how your clothes fit.

Tips for Success on Your 5 & 1 Plan (cont.)

Hitting a “plateau”

At some point, you may find that your rate of weight loss slows down or seems to stop. Even if you’re following the 5 & 1 Plan properly, you may experience a temporary change in your body weight from time to time, even at different times within one day. So, in addition to weighing yourself, take into account how your clothes are fitting and how you feel.

If you notice you haven’t lost any additional weight within the past two weeks, you can:

- Be sure you are getting in five Medifast Meals each day and following the Lean & Green Meal recommendations.
- Reduce the total carbohydrates in your plan. Revisit your Lean & Green Meal options and choose the lower carbohydrate vegetables from the Green Options List (page 5).
- Consider temporarily skipping the optional snack.
- Evaluate your condiment choices to decrease your total daily carbohydrates.
- Add a few more minutes of daily exercise.
- Try our *Momentum by Medifast* products, which are designed to boost your metabolism and help you burn more calories.

Remember, do not skip any Medifast or Lean & Green Meals – your metabolism could slow down and cause you to lose weight more slowly.

Reaching your goal

You can stay on the 5 & 1 Plan until:

- You’ve lost your desired amount of weight.
- Your doctor determines you’re ready for the transition phase.
- You become pregnant or you develop one of the contraindications listed on page 20.

The best part about Take Shape For Life is that once you’ve lost the weight, there are resource tools such as the **Take Shape For Life Transition & Maintenance Guide** to help you keep it off for life. Read about these phases on pages 15 – 18.

Exercise/Activity:

A Take Shape For Life success story

Rhonda lost
57 lbs.

Individual results will vary.

As a teenager I was always slightly plump but felt good and exercised on a dance team. Later on, after starting a sedentary job, I really started an unhealthy lifestyle. I only ate once or twice a day. My body held on to the weight as it thought it was starving. It just started creeping up and up slowly. I would then go on a "diet" and lose a few pounds and go back to my old lifestyle again. My own personal roller coaster!

I got married and started a family. After the third child my body started to hold on to the weight a lot more. I would overeat at dinner then sit and watch TV and nibble. Wow, and I didn't even realize what I was doing to my body.

Then I heard about Take Shape For Life through my friend Shannon, who lost 62 lbs. I was impressed and thought about doing the program, but thought I couldn't afford it. After a few months, my mother started the program because of her health issues. After ONE month, everyone was asking me: "Wow, what is your mother doing? She looks great. How is she doing it?"

I wanted to look and feel as good as my mother did, so I began the program! I went from a size 16 to a size 6. I feel so wonderful and my friends and family say I look beautiful. I feel so alive now. I have energy to run after my three kids and keep up with our busy life. My husband is seeing me like when we first got married. What a great feeling to love your life again and feel SO good too.

Thank you Take Shape For Life. I will be eternally grateful for the awesome change in my life.

* Take Shape For Life makes no claim that this result is representative of all Clients on the Medifast Program. For many dieters, weight loss is only temporary.

Which Medifast Shake is right for you?

All Medifast Meals can be used on the **5 & 1 Plan**, including special shakes for special needs. Talk to your Health Coach for more information and for help in choosing the most appropriate shake for your health and weight-loss goals.

Medifast 55 Shakes

For women:

- 11 grams of protein and 25 vitamins and minerals
- Soy-based, heart-healthy, and low-lactose

Medifast 70 Shakes

For men, and women who prefer additional protein:

- 14 grams of protein and 25 vitamins and minerals
- Soy-based, heart-healthy, and low-lactose

Medifast Ready-to-Drink

For those on the go:

- 11 grams of protein and 25 vitamins and minerals
- Heart-healthy and lactose-free
- On the go convenience packaging

Medifast Plus for Appetite Suppression

For extra appetite suppression:

- 15 grams of protein and 25 vitamins and minerals
- Super CitriMax®, a natural ingredient to help curb your appetite*
- Soy-based, heart-healthy, and low-lactose

Momentum by Medifast

For an extra metabolism boost:

- 100 mg of caffeine and 90 mg of EGCG to enhance fat burning and decrease appetite
- Using up to three products per day can help you break through a weight-loss plateau and maintain weight in your maintenance phase

Medifast Shakes featuring Antioxidants

For overall health by reducing cell damage:

- 1,000 ORAC units of antioxidants to block cell damage caused by free radicals & oxidative stress
- Supports heart & blood vessel health, vision, healthy aging, and more*
- Whey-based, heart-healthy, and low-lactose

*These statements have not been evaluated by the Food and Drug Administration. These statements are not intended to diagnose, treat, cure, or prevent any disease.

Health Management Shakes

These special shakes help you lose weight while addressing health concerns. Enjoy one to three each day as part of your **5 & 1 Plan**, or for general nutrition. Do not change dosage or discontinue prescribed medication without consulting with your doctor. **Do not use more than one type of Health Management Shake per day.**

Medifast Plus for Women's Health

For menopause:

- Black cohosh, echinacea, and chaste tree berry, which may help reduce symptoms of menopause*
- May be an alternative to hormone replacement therapy*

Medifast Plus for Joint Health

For painful joints:

- Glucosamine and chondroitin, which may help reduce joint pain and help strengthen cartilage*

Medifast Plus for Coronary Health

For coronary support:

- Coenzyme Q10, amino acids, and pycnogenol, which may help maintain heart health*

*These statements have not been evaluated by the Food and Drug Administration. These statements are not intended to diagnose, treat, cure, or prevent any disease.

Transition

Living the BeSlim® lifestyle

Once you've reached your weight-loss goal, it's time to make the transition into lifelong healthier eating with the BeSlim® lifestyle. The idea behind the transition phase is to gradually increase your calorie intake over time, while re-introducing a wider variety of foods.

In general, how long you spend in the transition phase depends on how much weight you have lost:

- less than 50 pounds, allow 8 weeks to transition
- 50 – 100 pounds, allow 12 weeks to transition
- over 100 pounds, allow 16 weeks to transition

Sample transition chart

(use after you've reached your goal weight)

Week	Target # of Calories	Medifast Meals	Lean & Green Meals	Additions
1	900 – 1,050	5	1	1 cup of your favorite vegetables
2	900 – 1,050	4	1	1 cup of your favorite vegetables AND 1 medium-sized piece of fruit OR ½ cup of cubed fruit or berries*
3	1,000 – 1,150	4	1	1 cup of your favorite vegetables AND 1 medium-sized piece of fruit OR ½ cup of cubed fruit or berries* AND ½ cup of low-fat or fat-free dairy
4 – 8	1,350 – 1,500	3	1	1 cup of your favorite vegetables AND 1 medium-sized piece of fruit OR ½ cup of cubed fruit or berries* AND ½ cup of low-fat or fat-free dairy AND additional 4-6 oz serving of lean meat** AND 1 serving of whole grain***

* Fresh, or if canned, unsweetened and packed in juice, not syrup.

** Grilled, baked, broiled, or poached – not fried.

*** Examples: 1 slice of whole-grain bread, ½ whole-grain English muffin, ¾ cup high fiber cereal, ½ cup whole-wheat pasta, or ½ cup brown rice.

Transition (cont.)

Ted lost 132 lbs.

Individual results will vary.

The sample transition chart on the previous page reflects an 8-week transition to an ultimate goal of 1,500 calories a day for weight maintenance. Your transition needs may be different depending on your gender, age, height, weight, and activity level.

The **Take Shape For Life Transition & Maintenance Guide** helps you create an individualized approach to staying at your new, healthier weight using the BeSlim® lifestyle. Get your free copy by contacting your Health Coach or visiting TSFL.com.

Maintenance

Living the BeSlim® lifestyle

The ultimate goal of the BeSlim® lifestyle is helping you sustain a healthy weight and an active lifestyle for the rest of your life.

Once you've completed your transition phase successfully, you're ready for the maintenance phase of Take Shape For Life: monitoring your weight, balancing your calories, making smart food choices, and staying active so you can keep what you've worked so hard to achieve.

Like the transition phase, the maintenance phase isn't one-size-fits-all. Your gender, age, height, weight, and activity level will determine your calorie requirements. Make sure you order your free copy of the **Take Shape For Life Transition & Maintenance Guide** directly from your Take Shape For Life Health Coach, through his or her Web site, or at TSFL.com.

Other hints for lifelong healthy eating

- Make **vegetables** account for ½ of your plate at mealtime.
- Eat at least two servings of **fruit** each day.
- Choose **lean cuts of meat** in four to six ounce servings (about the size of one to two deck(s) of cards or a computer mouse).
- **Bake, grill, steam, poach, and broil.** Avoid fried foods and cream sauces.
- Read **food labels** for serving size information.

The BeSlim® lifestyle

6 components for achieving Optimal Health

- **Breakfast every day:**
High-quality fuel, such as delicious Medifast Oatmeal, Cappuccino, or Chai Latte, is essential to start your day off right.
- **Exercise:**
Continued exercise increases metabolism and provides strength, flexibility, and mental clarity.
- **Support:**
Your Health Coach helps you reach and maintain your goals, with coaching, tools, education, and caring support.
- **Low-fat meals five to six times a day:**
Eating frequently and controlling portion sizes and total calories, especially those from fat, are critical for success.
- **Individual plan:**
Create an individual plan for achieving Optimal Health and building skills and strategies to cope with everyday life.
- **Monitor:**
Weighing yourself weekly helps you maintain your optimal weight and catch weight regain before it becomes a challenge.

Maintenance (cont.)

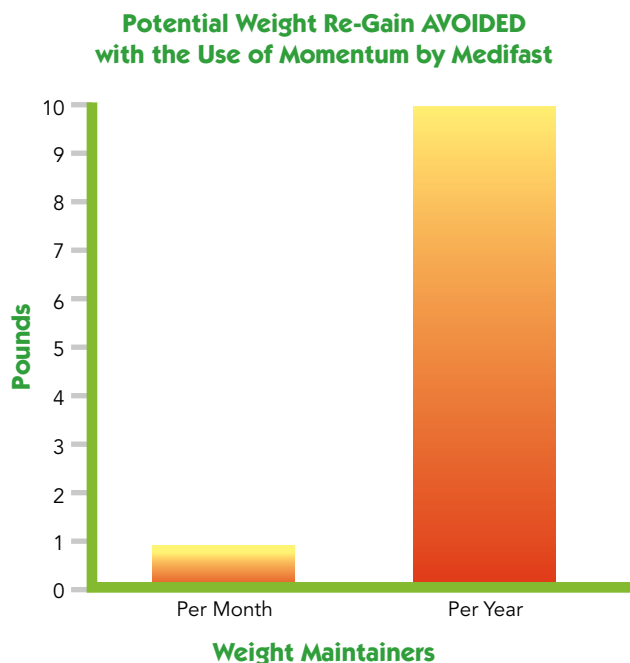

- Drink **calorie-free beverages**, including plenty of plain water.
- Restaurant servings are two to four times larger than normal. Get a **“to go” box** when you order at a restaurant and put at least half of your meal in the box as soon as it’s served. Or, **split your meal** with someone.
- Order **sauce or dressing on the side**, and use only a portion of it.
- Enjoy the superior nutrition of **Medifast Meals** as part of your lifelong approach to healthy eating.
- Stay in touch with **your Health Coach** and **friends on our Support In Motion Web site**, and reach out to new Take Shape For Life users: It’s a great way to make your new beginning an inspiration to someone else.

If you regain weight

If you regain five or more pounds, consider going back on the **5 & 1 Plan** for a few weeks. Think of it as a short-term refresher to put you back where you want to be.

For an extra metabolism boost, try **Momentum by Medifast**. Momentum Meals and Flavor Infusers™ contain 100 mg of caffeine and 90 mg of EGCG to enhance fat burning and decrease appetite,* and are specially designed to help you break through a weight-loss plateau and maintain weight in your maintenance phase.

Take an honest look at why the weight came back, and see if there are areas in your life where you can make lasting changes. Watch portion sizes, reduce stress, talk to your Health Coach, and take steps to address the emotional issues that can undermine your success.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Disclaimer: 100 mg of caffeine is equivalent to one cup of coffee. Consult with your physician before using this product. (This product may not be appropriate if you are sensitive to caffeine, advised by your doctor to limit caffeine, under the age of 18, or pregnant or nursing.) Recommended usage: Up to three Momentum products daily (any combination of Meals and/or Flavor Infusers). Consuming more than three Momentum products daily will not have an additional effect on metabolism.

Plan ahead

To make sure you don't run out of Medifast Meals, contact your Health Coach and re-order at least two weeks before your supply runs out. Your Health Coach can help you select individual foods or convenient Variety Packages.

Allow five to seven business days for shipping. For fast orders, you can request expedited shipping by calling our Client Contact Center at (800) 572-4417.

Save with the BeSlim® Club & Rewards Program, Take Shape For Life's progressive savings program. Following your first order, you'll automatically begin saving!

Months 1 – 3: 5%

Months 4 – 6: 8%

Month 7 and beyond: 12%

Talk to your Health Coach about the great benefits of this program or visit TSFL.com for details.

Denise lost 52 lbs.

Individual results will vary.

Questions and Answers

Q. Are there any medical conditions or medications that would prohibit me from using the 5 & 1 Plan to lose weight?

A. If any of the following apply to you, you should NOT use the 5 & 1 Plan for weight loss without your doctor's approval:

- Heart attack within the last three months
- Unstable angina
- Recent or recurring strokes or mini-strokes
- Severe liver or kidney disease
- Clotting disorders
- Active cancers
- History of eating disorders
- History of severe psychiatric illness
- Regular use of oral corticosteroids (more than 20 mg/day)
- Type 1 diabetes
- Peptic ulcer disease

Q. What about other prescription medicines?

A. Most prescription medications will not interfere with the 5 & 1 Plan. However, as you lose weight the dosage may need to be adjusted. Check with your doctor if you are using diuretics (water pills), lithium, or anti-seizure or thyroid medications.

Q. Are antacids okay?

A. Over-the-counter antacids and acid blockers are acceptable while you're on the 5 & 1 Plan.

Q. What if I have diabetes?

A. If you're taking medication for type 2 diabetes, make sure you inform your doctor BEFORE starting the 5 & 1 Plan, since losing weight may affect your medication requirements. If you have type 1 diabetes, the 5 & 1 Plan is not right for you. Please check with your doctor to see if you can incorporate Medifast Meals into your medically approved diet.

Q. What about high blood pressure?

A. Consult your doctor BEFORE starting the 5 & 1 Plan, because as you lose weight, your blood pressure may go down, and your medications may need to be adjusted to avoid feelings of tiredness or weakness.

Questions and Answers (cont.)

Q. What if I'm pregnant or breastfeeding?

A. We do not recommend weight loss or dieting during pregnancy. While pregnant, the focus must shift from weight loss to weight gain to support the needs of the baby. Medifast recommends that you consult with a physician.

Q. What if I'm lactose intolerant?

A. You can use a non-prescription enzyme such as Lactaid® or stick with any of Medifast's low-lactose and lactose-free selections. Talk to your Health Coach or visit TSFL.com for more information.

Q. What if I'm not feeling well?

A. Chances are you'll feel great on the **5 & 1 Plan**, especially after the first week when your body has adjusted to the program. If you continue to not feel well, consult your Health Coach, the Take Shape For Life Nutrition Support team, or your doctor.

Q. What if I get constipated?

A. You're eating less, which can cause less frequent bowel movements. If you feel constipated or experience hard stools, try:

- more fluids and more physical activity
- one to two tablespoons of canola, flaxseed, or olive oil
- a sugar-free fiber supplement (minimum dose for effectiveness)
- a stool softener or laxative if needed
- choose higher fiber vegetables from the Green Options List, such as broccoli, okra, spinach, or turnip greens

Nancy lost 135 lbs.

**Lost 225 lbs with
Take Shape For Life**

An old friend called and told me about this weight-loss program he had started and the incredible results he experienced. I purchased a one month supply of Medifast Meals and my Take Shape For Life journey began. I have now lost 225 pounds and see myself as a "doer," not a "watcher." Thanks, Take Shape For Life!
